4. Discussion Items—Consideration of DE criterion

Members discussed items a & b (below). No further action was recommended.

- a. If the courses in a program (all of them? a majority of them?) can be offered online, does that affect whether a program is offered at a second college (vs. more classes at the college where it's already offered)? This connects to the consideration for unnecessary duplication of an existing program.
b. Does the PPC have an interest in the mode of instruction for a new program? If the courses in a program (all of them? a majority of them?) can be offered online, that has implications for the marketing, facilities, likelihood of having enough completers, etc.

5. Adjourn—at 11:17 am
